

205-FR

Catalogue clés à double panneton, à pompes, à gorges, à chiffres, de coffres-forts, de meubles, de cave.

Qualité	V
Terminologie	VI
Identification clé	VII
Informations techniques	VIII - IX
Marques déposées	X
Clés d'origine et adaptables	I
Clés adaptables	3 I
Clés panneton, double panneton et à pompe italienne	5 I
Clés traditionnelles pour meubles	9 I
Clés pour coffres-forts	103
Index	13 I

Le premier catalogue moderne pour clés fut mis en page par Silca.

Silca eut l'idée de fournir un instrument de consultation qui pouvait permettre aux quincailleries d'identifier rapidement et en toute sécurité la copie correcte des clés.

Le catalogue représentait les clés en grandeur nature, disposées par ordre alphabétique et par marque: par une simple superposition de la clé originale à la page concernée du catalogue il était possible d'identifier la copie désirée.

Ce simple document, né pour faciliter la copie des clés, est devenu et reste encore aujourd'hui pour tous un outil de travail essentiel dans la profession.

Aujourd'hui, après plusieurs années d'expérience, la mise en page que Silca a utilisée ainsi que toutes les évolutions qui ont suivi, sont devenues un standard dans ce secteur.

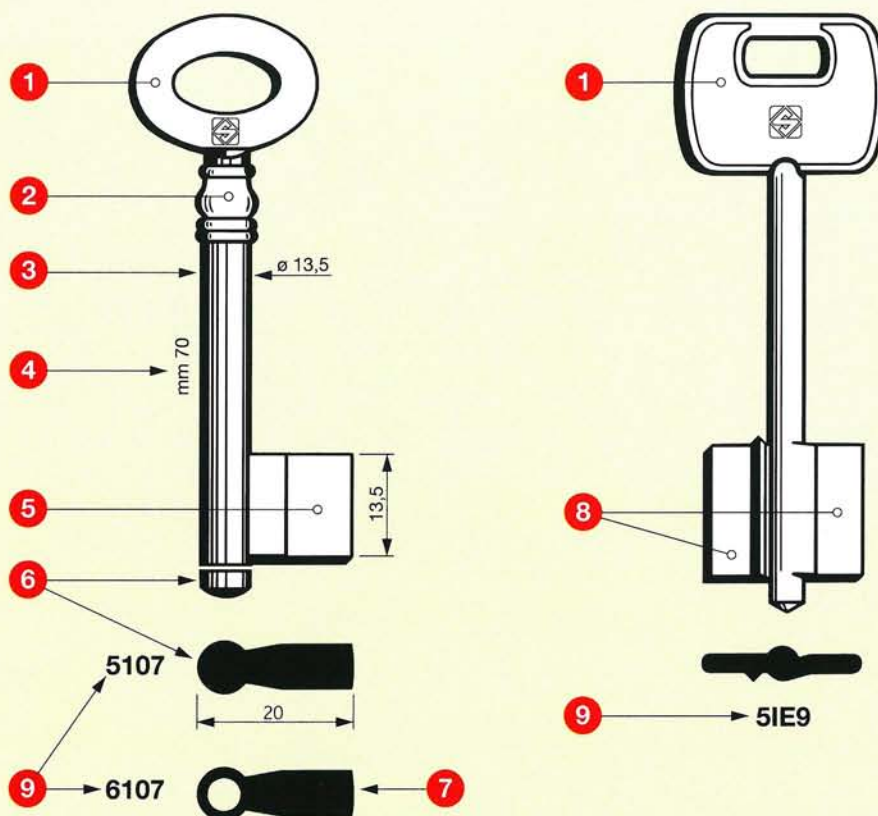

Cher client,

Nous vous remercions d'avoir choisi les produits Silca.

Nos clés sont produites exclusivement sur la base de matières premières sélectionnées et certifiées conformes.

Chaque phase du processus de fabrication de nos produits, est effectuée au travers de machines d'avant-garde et d'outillages exclusifs. Après des contrôles très sévères de toutes les variables qualitatives possibles du produit: dimensions, aspect esthétique, correspondance parfaite du matériel et du produit-même aux caractéristiques spécifiques originales et/ou demandées par le client, chacune de ces mêmes phases opératives est ensuite certifiée individuellement.

Le choix d'adopter un processus de contrôle SPC (Statistic Process Control) pour chaque phase de la fabrication, en garantit le contrôle en temps réel.

1 Tête	3 Diamètre de tige	5 Panneton	7 Femelle (forée)	9 Article Silca
2 Embase	4 Longueur totale	6 Mâle (à bout)	8 Double panneton	

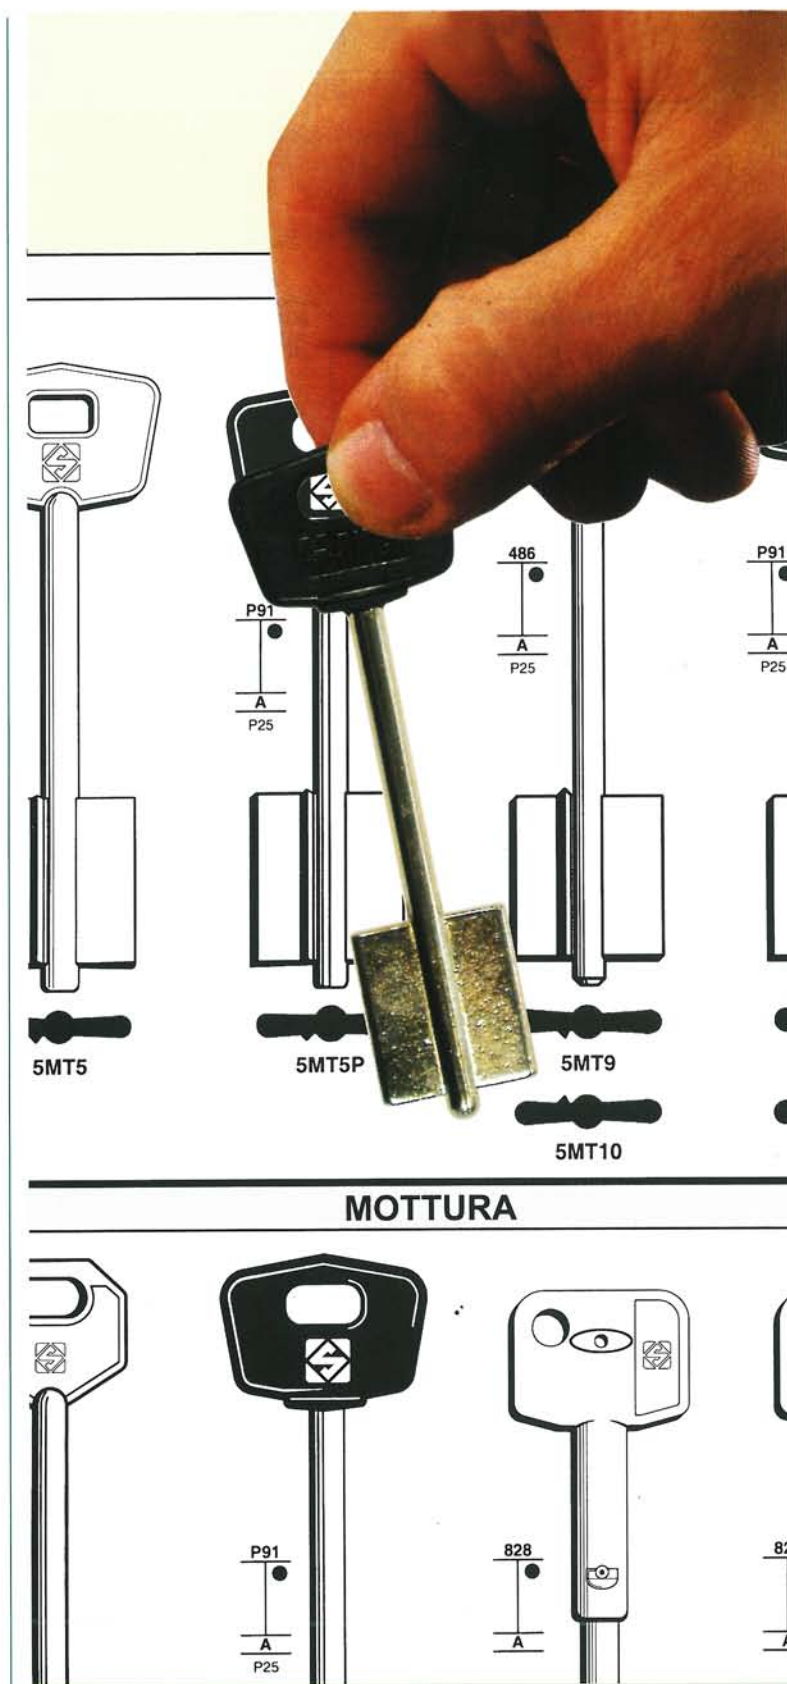

Les dessins des clés sont à

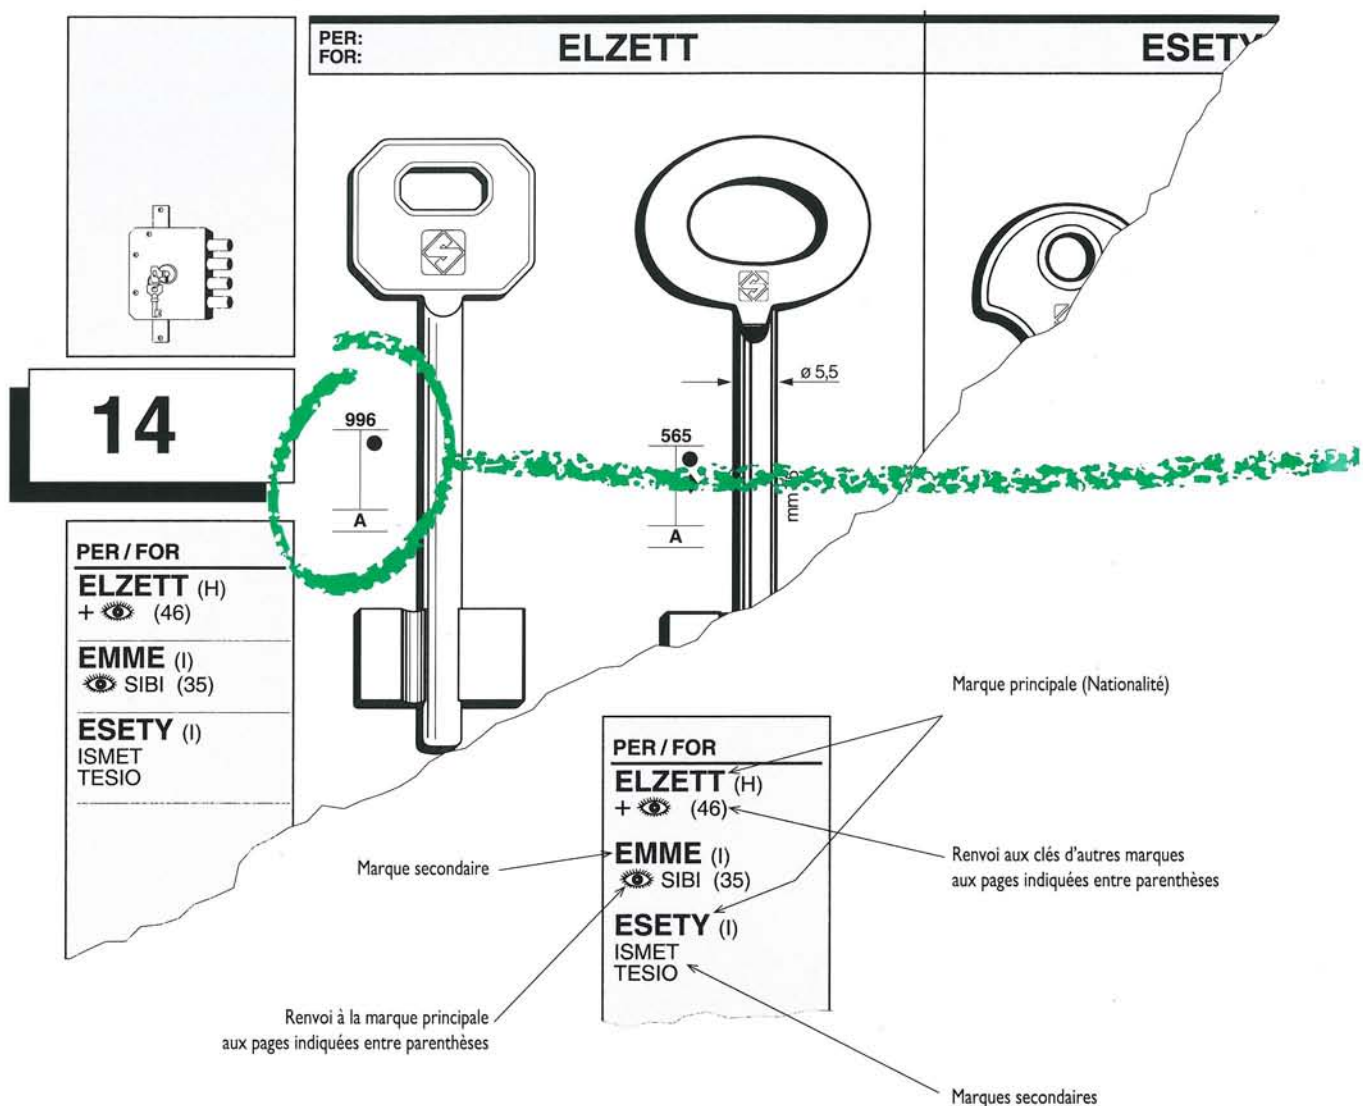

échelle 1:1.

Les profils (section du canon) sont
vus de la tête.

Pour la recherche il suffira de
superposer la clé échantillon au
dessin en examinant tout
particulièrement le canon (tige) et
la section (profil).

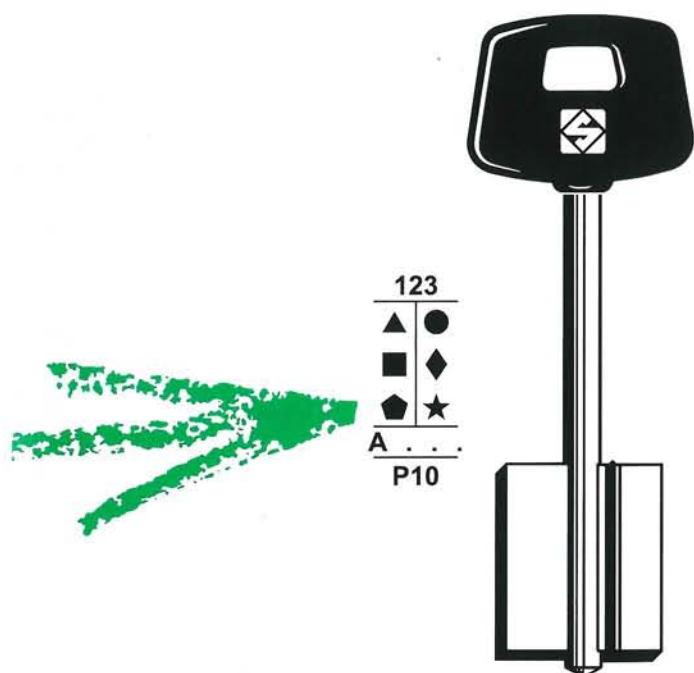

Têtes originales différentes sont
représentées par des lignes en
tirets.

IMPORTANT

Conformément aux lois en vigueur concernant la propriété industrielle, nous vous informons que les marques et appellations commerciales citées dans notre catalogue appartiennent exclusivement aux fabricants de serrures et aux utilisateurs autorisés. Ces marques ou appellations commerciales sont indiquées à titre d'information pure et simple pour vous permettre de déterminer rapidement les serrures auxquelles nos clés sont destinées.

Ce catalogue est réservé exclusivement aux professionnels du taillage de clés qui utilisent les produits Silca.

Les illustrations et les caractéristiques techniques des produits présentés dans ce catalogue sont données à titre indicatif.

Bien que les caractéristiques essentielles des produits soient invariables, Silca se réserve le droit d'apporter toutes les modifications qu'elle retiendra nécessaires et opportunes afin d'améliorer la qualité de ses produits.

Tous les dessins et photos sont propriété Silca et toute reproduction, même partielle, sans l'autorisation écrite préalable de Silca est interdite conformément aux prescriptions légales.

Tout litige est du ressort exclusif des Tribunaux de la circonscription où se trouve le Siège de la Société.
